Dealing with a tick bite

To remove a tick safely:

1. Use fine-tipped tweezers or a tick-removal tool – you can buy these from some pharmacies, vets and pet shops.
2. Grasp the tick as close to the skin as possible.
3. Slowly pull upwards, taking care not to squeeze or crush the tick. Dispose of it when you've removed it.
4. Clean the bite with antiseptic or soap and water.

The risk of getting ill is low. You don't need to do anything else unless you become unwell.
